The weather

- 1** Listen and repeat. Which of these weather conditions are common in your country in: winter? spring? summer? fall?

In the winter, it's often chilly but not freezing cold. There's sometimes heavy rain, but we don't have any blizzards ... etc.

ABOUT ME

Matt of the Antarctic

My year in Antarctica

Week 1 – My Antarctic adventure begins!

Hi, everyone!

Well, here I am at the scientific research station in Antarctica, the coldest, windiest, and driest continent in the world! It's summer right now, so the weather is quite 'mild' – it's 32°F today! There are still a lot of gales, though, and of course, the sun never sets in the summer, which is really weird! Despite the freezing cold, the scenery and wildlife here are incredible. There are seals everywhere and yesterday I saw a humpback whale.

Everyone is warning me about the winter here! The temperature will drop to about -40°F and the sun won't rise at all. There will only be 20 of us and we won't have any visitors for 7 months. It'll be difficult, but at least I'm going to be very busy. As a marine biologist, I'm going to study the way marine wildlife adapts to extreme temperatures. I'm also going to do a survey of the threatened Emperor Penguin. I can't wait to start!

Tomorrow, all the newcomers are going on a survival course for a week with ski-dos and sledges. We're going to camp in the snow and learn things like what to do if we fall down a crevasse*. I hope there won't be a blizzard like the one we had on my first day here.

Well, bye for now! I'll tell you all about the course when I'm back at the research station next week.

Matt

* Crevasses are deep cracks in the ice, sometimes covered by snow!

Future tenses

4 Read the theory. Find more examples in the blog.

We use **will** for:

- on-the-spot decisions *I'm cold. I think I'll go indoors.*
- promises *I'll write again soon!*
- predictions based on what we think/believe will happen
I think it'll snow tomorrow.
- information about the future *There won't be many people here next month.*

We use **going to** for:

- plans/intentions *He is going to fly to Mexico next week.*
- predictions based on what we see/know *Look at those dark clouds! It's going to rain.*

We use the **present progressive** for fixed arrangements in the near future *Matt is writing his blog this afternoon.*

We use the **simple present** for timetables *The train leaves at 7:00.*

Note: After time words (while, before, after, until, when, if, etc.), we don't use **will**. We use the simple present. *I'll call you when I reach Antarctica.* (NOT: *when I will reach*) **BUT** *When will you arrive?* (question word)

5 Fill in the blanks with the verbs in parentheses in the correct tense. Explain your choices.

- A: What are your plans for the weekend, Dave?
B: I (go) hiking in the mountains.
- A: It's really cold in here!
B: I (put) the heat on.

You need an inflatable armchair and flippers to go river bugging.

Reading

2 a) Look at the text. What do you know about these three activities? How can you go faster when doing each one? Read to find out.

EXTREMELY WEIRD!

Volcano Surfing

If you want to try this new craze, you'll have 1) to Nicaragua's Cerro Negro volcano. When this active volcano erupts, it throws out ash that's perfect 2) surfing on. Hike for 45 minutes to the top of the mountain, walk around inside the smoking volcano, then put on some protective clothing and fly down the slope at 50mph! If you sit down on your board, you'll go even faster.

Wok Racing

Imagine speeding down an icy track at 60 mph in a Chinese frying pan. Wok racing started as a joke on German TV, but it soon became very popular and now 3) is a world championship every year. For protection, competitors wear a special suit and helmet and they also put ladles on their feet! So how do you 4)? Well, here's a hot tip – if you warm the bottom of your wok before competing, it melts the ice and you go faster.

River bugging

You can sit in it, but you won't get any rest in this inflatable armchair. A river bug speeds you along a river and down rapids. If you 5) to control it well, you'll need webbed gloves and short flippers. Go backwards to go faster. The only problem is that you can't see 6) is coming if you go backwards. Watch out for that rock!

If you want to hike through some of the most stunning scenery in North America, then the Appalachian Trail is for you. It takes over five million steps to walk it and only 1 person in 4 makes it **all the way**.

► **What is it?**

The Appalachian Trail is a footpath that runs through 14 states from Mount Katahdin, Maine, in the north to Springer Mountain, Georgia in the south. It follows the Appalachian Mountains through over 2,000 miles of **incredible** natural beauty.

► **What can I see?**

The trail passes through forests and valleys, across mountain tops and down rocky paths. It's home to some wildlife you'll want to see, and some you'll want to **avoid!** There are **harmless** deer, moose, and raccoons, but there are also dangerous black bears, coyotes and bobcats. Don't worry about **getting lost**. Every quarter-mile, there are white signs called 'blazes' on trees, rocks, and posts. If you climb above the forest, you'll see a breathtaking view, but you'll also see piles of stones called 'rock cairns' to guide you.

► **Where can I stay?**

Most hikers stay at one of the 250 campsites and shelters (huts with an open front) along the trail.

Global Warning!

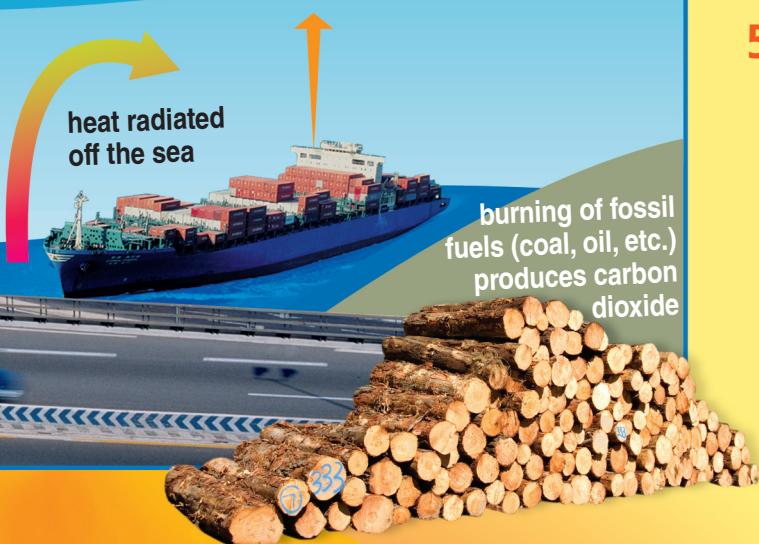

The Earth is **heating up** and most scientists believe that it's all our fault. When we burn fossil fuels, greenhouse gases such as carbon dioxide increase and **surround** the earth like a thick blanket. This **traps** heat and temperatures rise. Scientists say that in the next 100 years, average temperatures will rise by about 5-9° F. This doesn't sound like a lot, but it means **BIG** trouble! Ice is already melting, sea levels are rising and the climate is changing. How exactly is all this changing our world, and what will happen if we don't act in time?

Cities under the sea

According to recent climate reports, melting ice from the polar ice caps and mountain glaciers could cause sea levels to rise by about 3 feet by 2100. If this happens, whole countries such as the Maldives will **vanish** and millions in low-lying areas like parts of Bangladesh will lose their homes. Already, two small Pacific islands have disappeared under the waves. Coastal cities including Shanghai, Bangkok, New York and London will also be **under threat**.

In Greenland, ice is melting three times faster than just a few years ago. If the ice sheets of Greenland and Antarctica ever melt completely, sea levels will rise about 200 feet. That's enough to **cover** almost every major city on Earth!

heat trapped by CO₂ in the atmosphere

animals are in danger of losing their habitats or may become extinct

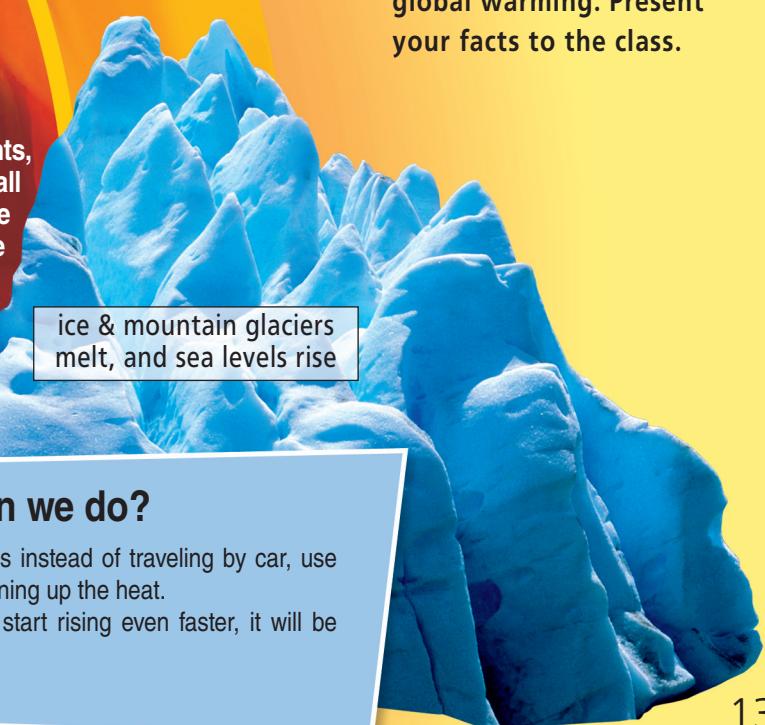

Wildlife in great danger

Global warming is a serious threat to wildlife. In particular, Arctic polar bears are in great danger. The ice that they hunt from is melting very fast, so they have to swim further and further to find food. Many **starve** or drown. By 2100, summer ice may disappear completely in the Arctic, and polar bears probably won't survive. Changing weather patterns and rising sea levels threaten thousands of other species too. Some people believe that 30-40% of the world's species could **become extinct** because of climate change.

Wild wild weather!

Heavy rain and snow, storms, heatwaves, droughts, more powerful hurricanes and tornadoes ... these all happen a lot more **frequently** these days and more and more climatologists now believe this is because of global warming. When sea temperatures rise, there are changes in the atmosphere. If you live in a chilly place, you might think global warming sounds great. But climate change doesn't just mean hotter temperatures. It means more and more extreme and **unpredictable** weather!

ice & mountain glaciers melt, and sea levels rise

So ... what on earth can we do?

Reduce your carbon footprint*. Cycle, walk, or take a bus instead of traveling by car, use energy-saving bulbs, and wear more clothes instead of turning up the heat.

Experts say we must do something NOW! If sea levels start rising even faster, it will be impossible to stop!

* how much CO₂ we personally produce due to our lifestyles!

From: Sandra Harvey
To: Brian Smith
Subject: Forest adventure weekend

1) Hi, Brian,
I read your advertisement for the forest adventure weekend and
2) I'd love to come on the trip with you. However, I would like to ask you a few questions about it.
First of all, how much does the weekend cost? Also, where exactly is the weekend going to take place?
Secondly, your ad mentions some of the activities we will take part in on the trip, such as zip-lining. 3) What else can we do? Also, will I need to bring any special clothes or equipment with me?
Thank you very much for your time. 4) Can't wait to hear from you.
5) Love,
Sandra Harvey

Caves

These natural holes in the Earth **form** over thousands or even millions of years! There are lots of different types of caves, such as ice, sea, limestone, chalk, salt, and even lava caves.

1

Different caves form in different ways. For example, limestone caves form as acidic rain **dissolves** rock. Sea caves form as ocean waves and heavy rain **erode** cliffs. Ice caves form as melting water runs under glaciers or through cracks in the ice.

2

In many limestone caves, stalactites grow slowly from the ceiling as calcite* from dripping water **hardens**. As water **drips** from them, similar formations called stalagmites grow up from the floor. When stalactites and stalagmites meet in the middle, they form columns.

3

Scientists have **discovered** over 7,700 'troglobites' **so far**. These are unique species of fish, spiders, millipedes, crabs, scorpions, and other creatures that live their whole lives in caves. They have often **adapted** to the dark conditions. Some are blind but have a great sense of smell. Others **survive** for a long time, such as the cave crayfish, which can live for 175 years!

4

Caving is an adventure sport that involves walking, crawling, climbing, abseiling, and even swimming and rafting through caves! It's popular and a lot of fun!

Secondly, I took part in a beach clean-up last year and I had to bring my own plastic gloves and lunch. Do I need to bring anything with me to the clean-up day or wear any special clothes? Finally, my little sister would like to join in too, but she's only 8. Is she too young to take part?
